

Daniel Giménez Parra

SOFTWARE DEVELOPER

I am a software developer with a background in Multiplatform Application Development. I have acquired a solid foundation of knowledge through my studies, and I am currently expanding my skills by working on a personal mobile application project. This has allowed me to explore new technologies and improve my self-management abilities.

I am seeking a job opportunity in a company where I can continue to grow professionally, learn from a team of experts, and contribute with innovative solutions in the software development field.
